DESIGN SERVICES DRIVING INNOVATION

For over 15 years, ASMA has been developing innovative industrial systems for the aeronautical, automobile and boating sectors among others. Its core strengths lie in mechanics, hydraulics/pneumatics, industrial automation and computerized command-control technology.

ASMA designs and produces equipment customized to client specifications.

OUR STRENGTHS

- ↘ Custom-designed RTM
- ↘ End-to-end management
- ↘ Efficient process control
- ↘ Efficient cleaning

OUR REFERENCES

- ↘ Dassault Aviation
- ↘ Duqueine
- ↘ Pika
- ↘ Compositadour

YOUR PARTNER IN RTM PROJECTS

Each RTM application is specific, as every client has its own constraints and requirements.

ASMA offers RTM injection equipment based on reliable, field-proven solutions, tailored to each particular case. Its machines are fitted with a unique system to efficiently and automatically clean all its components.

PERFORMANCE OF THE **ASMA RTM**

Resin preparation:

- heating and thermal regulation of the resin
- degassing and mixing of the resin
- level control of the resin

Resin injection:

- heating and thermal regulation of the resin
- adjustment of injection volume and flow-rate
- injection pressure control

Automatic cleaning:

- selection of the most suitable cleaning cycle
- elimination of residual resin
- efficient cleaning and drying of all the components

ASMA AFFILIATE OF THE **ARTZAINAK GROUP**

The Artzainak group designs, manufactures and sells a wide range of mechanical and plastic products. Its prime markets are aeronautics, civil engineering and construction, agriculture, oil & gas and boating.

The Group relies for its development on its recognized study capabilities and know-how. Organized by sector of activity, it efficiently mobilizes affiliates working within the same market.

Artzainak now encompasses eight brands: Armax, Asma, Drillstar, Dynaéro, EBL, Emeca, Lagarde and Lecomble & Schmitt.
